## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jenkins ('496) in view of Porter ('270). The primary reference discloses the invention substantially as claimed, namely a hollow plastic tube having a longitudinal split with a plurality stalks of vegetation attached to the tube; see Figure 1, and column 2, lines 16-32 and 61-64. However, the primary reference does not disclose stalks inserted into holes in the tube. The secondary reference discloses that it is well known in the artificial vegetation art to attach vegetation to substrates by providing holes in the substrate and inserting the vegetation into the holes; see the Abstract. It would have been obvious to one of ordinary skill in the art to attach the vegetation in the primary reference's article to the tube by inserting the vegetation into holes as taught by the secondary reference in order to be able to vary the pattern needed for a particular end use. It would also have been obvious to one of ordinary skill in the art to use a band in addition to the split to attach the tube of the primary reference to a substrate if a more secure attachment is desired since the use of bands to attach items to substrates is well known.

3. Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jenkins ('496) in view of Porter ('270) as applied to claims 1, 2, 4 and 5 above, and further in view of either Garry 5,733,612 or Li. Garry and Li disclose the use of barbs on the ends of artificial vegetation to prevent removal of the stalks from substrates to which they are attached; see the sentence bridging columns 3 and 4 of Garry and column 4, lines 60-65 of Li. It would have been obvious to one of ordinary skill in the art to use barbs on the ends of the vegetation attached to the prior art article in view of the teachings of the secondary references to stabilize and prevent removal of the vegetation.

***Allowable Subject Matter***

4. Claims 7-10 are allowed.
